

Transforming Saudi Supply Chains with Digitization, Automation, and Financing

AEZ DIGITAL
Transforming Businesses

Market Needs

The background of the slide is a stylized, isometric illustration of a logistics hub. It features a large port area with several cargo ships docked at a pier. A multi-lane highway runs diagonally across the middle, filled with various trucks and cars. In the foreground, a large commercial airplane is shown in flight, and a train is visible on tracks in the bottom right corner. The color palette is dominated by blue, orange, and white.

Saudi Arabia's Vision 2030 and regulatory landscape (PDPL) demand advanced, compliant, and efficient supply chain solutions.

Industries across retail, automotive, manufacturing, healthcare, finance, and government face challenges in cash flow visibility, inventory management, compliance, and operational efficiency.

Supply Chain Digitization Solution

End-to-End Digitization:

Automates data flow and integrates with ERP systems, enhancing operational efficiency.

Payments Automation: Reduces payment delays and improves cash flow visibility with real-time reconciliation and Open Banking compliance.

Embedded Financing: Provides instant access to working capital directly within the platform, improving financial agility.

Industry-Specific Impact

Automotive:

30% reduction in inventory delays.

Retail:

98% improvement in on-time supplier payments.

Manufacturing:

Minimized downtime, compliance with PDPL.

Healthcare:

25% reduction in stockouts, secure data handling.

Financial Services:

40% faster transaction processing.

Government:

20% administrative cost savings, PDPL compliance.

Key Benefits

Cost Savings:

Reduction in manual processing and administrative costs.

Operational Agility:

Real-time insights, streamlined payments, and supply chain resilience.

Regulatory Compliance:

Localized, PDPL-compliant, reducing regulatory risk.

Why US?

Localized expertise, compliance-focused, and purpose-built for Saudi industries.
